

LiveDiscover™ Forensic Edition

Live Forensic Discovery

Identify
Targets

Assess
Vulnerabilities

Rapidly Map
Enterprises

LiveDiscover Forensic Edition (FE) is the premier tool for rapid full distributed network assessment and mapping, which is a critical first step in any digital investigation. Designed for forensic investigators, LiveDiscover FE rapidly scans a range of IP addresses and generates comprehensive forensic reports including easy to view graphs on each located device within the specified network. With the case management features, investigators can tailor reports and case details, making evidence court ready. Built-in customization allows for the creation of modified vulnerability scripts making LiveDiscover FE field extensible.

Key Features:

- Live forensic network discovery
- Live forensic vulnerability assessment
- Automatically identify operating systems including Windows, Unix, Linux, Mac, VMS, Novell, and Sunsystems
- Remote detection of system status including running services, attached devices, and open shares
- Forensically map communication devices, printers and more
- Forensic detailed report generation

System Recommendations:

- Microsoft Windows® 2000
- 20 MB free disk space
- 256 MB RAM
- Pentium® III 1GHz processor

License:

- Single user license
- Site licenses are available upon request

Free software maintenance for one year from the date of purchase!
