

Stego Suite™

Discovering The Hidden

Stego Hunter™

Stego Watch™

Stego Analyst™

Stego Break™

Identify Steganography Applications ■ Detect Presence of Hidden Messages ■ Analyze Image Characteristics ■ Reveal Vital Evidence

Stego Suite is comprised of four specialized products: Stego Hunter™, Stego Watch™, Stego Analyst™, and Stego Break™. This comprehensive suite of applications is designed to quickly identify, examine and analyze digital images and/or audio files for the presence of hidden information or covert communication channels. Detecting the presence of steganography is a tedious process; without advanced tools it is close to impossible to detect. Using Stego Suite investigators are able to utilize the latest algorithms for flagging suspicious files through a blind anomaly-based approach, examine files with image filters, analyze DCT coefficient histograms, and track palette manipulation with close color pairs, shortening investigation time drastically and allowing investigators to work specifically within the four tools provided in the suite.

Key Features:

- Rapid identification of known steganography programs
- Flag suspicious files through blind anomaly-based approach
- State-of-the-art image and audio analyzer
- Crack and extract payloads from carrier files
- Court ready investigator reports
- Scan audio files, JPG, BMP, GIF, PNG and more

System Recommendations:

- Microsoft Windows® 98 or higher
- 100 MB free disk space
- 512 MB RAM
- Pentium® III 1GHz processor

License:

- Single user license allows for installation of entire suite
- Site licenses are available upon request

Free software maintenance for one year from the date of purchase!
