

Gargoyle Release Notes

WetStone Technologies | September 2015

- This release covers maintenance to datasets to reduce false positives.
- New threats have been added to the Encryption, Keylogger, Peer-to-Peer, Anti-Forensics, Toolkit, Password Cracking, Piracy, Fraud Tool and Remote Access categories.
- Updated versions of previous programs have been added.
- The separate custom dataset has been updated.
 - ****Note**** This download is separate from the normal datasets.

NOTE: Our datasets are being continually updated and despite constant analysis and filtering the introduction of false positives is possible. We welcome any suggestions, comments and concerns regarding our datasets
