# PRESS RELEASE

## WetStone/CST Introduce The Live Investigation Suite™ at DoD Cyber Crime Show

**St. Louis, Missouri January 26, 2009:** WetStone Technologies, Inc. a leader in cyber investigation technology and Cyber Security Technologies (CST) an innovator in affordable software products for computer investigations are delivering a new Live Investigation Suite to the market today at the DoD Cyber Crime Show in St. Louis, Missouri.

The new Live Investigation Suite provides investigators the ability to collect evidence on and across an enterprise network, rapidly identify malicious code and unauthorized documents. The suite contains four critical pieces of technology: LiveDiscover™, LiveWire™ Investigator and Gargoyle Investigator™ Enterprise Module from WetStone; and the OnLine Digital Forensic Suite™ (OnLineDFS™) from Cyber Security Technologies.

“Our continued partnership with Cyber Security Technologies is an important one as it allows us to offer a best-of-breed: network discovery, simultaneous enterprise wide triage, direct on-demand investigations and imaging, along with rapid malicious code discovery” stated Chet Hosmer Sr. Vice President and Chief Scientist at WetStone.

John Metil, President of Cyber Security Technologies, said “We are very pleased that WetStone has selected our OnLine Digital Forensic Suite to be included in WetStone’s Live Investigation Suite. The OnLineDFS technology for live, on-demand investigations over a network without pre-installed agents is a powerful addition to WetStone’s bundle of industry-leading products. We are delighted to be a part of it, and look forward to our continued relationship with WetStone.”

---

WetStone Technologies, Inc.: is a global provider of innovative cyber security solutions. Since 1997 WetStone has continued to equip their customers with the research, technologies, trainings, and services that are needed to defend against today’s cyber criminals. WetStone is a subsidiary of Allen Corporation of America. [www.allencorporation.com](http://www.allencorporation.com).

Cyber Security Technologies Corporation: (CST) is a software technology company dedicated to developing and distributing innovative products for digital investigations. CST develops software solutions that are technically advanced, affordable, and easy-to-use, which address two under-served needs: technology to investigate live, running computer systems across a network; and technology to automate the detection and analysis of Peer-to-Peer (P2P) client programs and associated files.
